Re; Recommendation Letter for Excellence in Construction Program

Project; Stoller Winery, Dayton, Oregon

Dear Greg

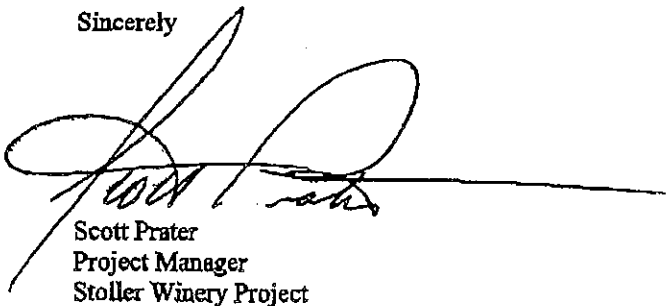

It is with great pleasure I am writing this recommendation letter for your efforts at the Stoller Winery project in Dayton, Oregon.

Hunter-Davission was selected before the project began based on your positive track record and our experience with your firm in the past. Your Firm was pro-active providing budgeting information early in the project. When streamlining to meet budget goals was requested your team including David Bradley, Bret Dawson, Chris Campbell and yourself put in many hours to respond to the challenge.

Hunter-Davission's most outstanding contribution was in the field. Design drawings were finalized in late spring. Harvest was scheduled for late August. Matt Hooper, George Allen and their crew were very flexible in working around other trades to install piping, boilers, a 54 ton custom chiller and associated computer controls in whatever area was available. Matt, George and their people worked nights and weekends to make sure the Stoller's were able to use the Winery for the 2005 Harvest. Without their dedication in the field and the support of Hunter-Davissions main office, Chris Campbell in particular, Harvest 2005 would not have happened PERIOD.

The highest compliment was paid by our project Superintendent Richard Russell. Mr. Russell has been in construction for close to 40 years. He has stated many times that the field crew lead by Matt Hooper and George Allen are among the finest he has ever worked with.

Sincerely

Scott Prater  
Project Manager  
Stoller Winery Project
