**Re: 911 Building, Portland, Oregon
Remodel & New Addition**

To whom it may concern,

Environmental Control Corporation would like to express our appreciation for the leadership efforts put forth by the design/build team at Hunter-Davisson, Inc. From the very beginning of the project, Hunter-Davisson demonstrated that meeting and exceeding the owner's expectations were of the highest priority.

The 911 Building was a difficult project being it is a 24 hours operating facility. Working with Hunter Davisson project manager Dave McCotter and their installation crew, the project went smooth with minimal change orders and cost impact. Allowing us and all contractors involved with the mechanical system to complete the project on schedule.

We have worked with Hunter-Davisson Inc. on several other jobs in the past, and they have all been an extremely positive experiences. They are a mechanical contractor who professionalism and work, stands out above the rest. I would recommend Hunter Davisson Inc. to any building owner looking to maximize the performance of an existing building, or receive leading-edge yet cost efficient mechanical design on any new projects.

Sincerely,

A handwritten signature in black ink that reads "Terry Hawthorne". The signature is written in a cursive, flowing style.
